

LIVE TOGETHER, LEARN TOGETHER

**PROJECT
CONNECT**

Project Connect is all about connecting people with skills and with each other. We offer a broad range of activities and experiences that help people develop the confidence and skills they need to empower them to make a difference to their communities, both local and global.

We work in all areas of the community but focus on offering alternative education opportunities to children and young people.

We want our projects to be accessible to all. Costs are always kept to a minimum and wherever possible our programmes are free to access. If cost is ever a barrier we can always find a solution.

Find out more about what we do: www.projectconnect.org.uk

FOREST SCHOOL Taster Sessions

Forest School is a holistic, child led and multi-sensory approach to self development and skill development. Through play and exploration children develop confidence and self esteem. Opportunities are provided for children to learn how to manage and take risk. Forest School is suitable for all ages and abilities and sessions are tailored to meet individual learners needs.

Our package of Forest School taster sessions are an introduction to exploring and learning in a woodland environment using all 5 senses. Our Forest School taster sessions are a great way for children to experience Forest School before starting a long term Forest School programme.
