

Clay Creatures

Description/Instructions:

- Mould a ball of plasticine or air drying clay into a shape for a body.
- Use natural materials to add features the creature – eyes, mouth, legs, wings, pincers etc.
- As an extension the children could build a home for their creature. Talk to them about the type of habitat that different woodland animals live in and why. Ask them what type of habitat they think their creatures would live in.

How could this activity be adapted for different learners?

What tools or equipment are needed?

Air drying clay or plasticine.

What themes or topics could this activity support?

What areas of development could this activity support?

- Communication, Language and Literacy
- Physical Development
- Personal, Social and Emotional

- Problem Solving, Reasoning and Numeracy
- Knowledge and Understanding of the World
- Creative Development
